25X1

SECRET 25X1 in the installation.5 25X1 On 19/20 August 1955, the Pionier Kaserne (4502) in Fuerstenwalde was occupied by 700 mem at most. We activities or heavy weapons were observed inside or outside The Braunsdorfer-Strasse Kaserne (4501) in Fuerstenwalde was still occupied by approximately 2500m3000 men. It is believed that 2 units are stationed in this installation. On 20 August 1955, the following vehicles left the Karlshorst cantenment (4161) in Berlin-Karlshorst is the direction of Koepenick: 4 x T-34/85s, 2 x SU-100s, 6 x 3-exle armered personnel carriers, 2 x 57-mm AT guns, 4 x 120-mm mortars. 8 trucks each carrying approximately 20 EM, 1 jeep, 1 motorcycle, 1 ambulance, and 2 field kitchens. On 24 August 1955 at approximately 2140, the fellowing column left the Karlsherst cantemment for the Schoeneweide railroad station: 8 x 3-axle armored personnel carriers, 1 x 2-axle armored personnel carrier, 3 tank trucks, 1 radio truck, 1 repair-shep truck, 6 trucks each with mounted AAA machine guns and occupied by 3 soldiers, 4 AT guns, 4 x 76-sm field guns, 25X1 4 x 120-mm mortars, and approximately 35 trucks carrying a total of approximately 500 men. On reaching the Schoeneweide railroad station, the vehicles and weapons were entrained without delay. At approximately 25X1 0020, 12 x T 34/85s and SPs, approximately 120-mm, which were observed for the first time in the Karlsherst cantenment, 2 repair-shep trucks and 1 truck went to the Scheeneweide railread station. These vehicles were loaded onte a treop train which included 12 bexcars 10 of which carried personnel and 2 billeting equipment. The treep train left the Schoeneweide railread station in the direction of Gruenau at approximately 0100. Comment. This troop train carried elements of the 63d AAA Div which 25X1 wers presumably transferred to the Wustrow AAA firing range. 25X1 Comment. Presumably elements of the 3d Engr Regt of the Fourth Gds Mecs Army were entrained. Ne information is available on the destination of this troop train. 25X1 Goment. It is believed that the 3d Engr Regt was supplied with 3-exle amphibious vehicles. 25X1 Comment. Previous reports on the occupation of the Panzer Kaserne in Bad Freienvalde are confirmed by these observations. 25X1 Comment. The presence of rocket launchers in the Pionier Kaserne is reported for the first time. Possibly the 312th Gds RL Regt of the Fourth Gds Mees Army or the u/1 RL Bm of the 7th Gds Mecs Dis. were transferred to the Pienier Kaserne from the Braunsderfer-Strasse Kaserne (4501) in Passetamelde or from the Ziethen 25X1 Kaserne (4444) in Frankfurt/Oder respec Antily, The JS-tooks belong presumably to the Tank Training BN of the 7th Gds Ness Div. 25X1 Comment. the Pienier Kaserne was occupied to capacity by approximately 3,000 men prior to 12 August 1955. Since ne loadings were reperted during the peried under review, it is believed that the bulk of the units had left the Pionics Kaserne for local field exercises. Comment. According to information available, the Braunsdorfer-Strasse 25X1 Kaserne in Fuerstemmalde is occupied by the 312th Gds RL Regt of the Feurth 25X1 Gds Mecs Army (See Comment 5 of this report). Rocket launchers had been 25X1 SECRET 25X1
